Full Stack Developer | API Development | Vue.Js & Inertia.Js |
Web Designer | Frontend Development | AI Integration &
Automation

As a skilled Web Developer, I specialize in crafting sophisticated, efficient websites with a strong focus on aesthetic design and problem-solving. With expertise in HTML, CSS, JavaScript, and responsive design methodologies, I am also proficient in PHP, MVC, Laravel, MySQL, Vue.js, and Inertia.js. My academic background and passion for technology drive me to innovate and lead web development initiatives.

Experience

Feb' 2024 - Present

CodersHut | Ahmedabad

Full Stack Developer

- Full-Stack Development: Proficient in frontend and backend integration using the **Laravel framework** and **Vue.js**, ensuring seamless **API** communication and data flow.
- User Interface Development: Designed dynamic and user-friendly interfaces with features such as menu browsing, reservation systems, and interactive contact forms, delivering an immersive dining experience using **Laravel** and **Vue.js**.
- Admin Panel Integration: Developed a comprehensive admin dashboard for restaurant staff, enabling streamlined management of menus, reservations, user accounts, and website content with real-time communication between user and admin components.
- Backend and Database Optimization: Implemented secure user authentication, built scalable backend solutions, and optimized SQL databases with PHPMyAdmin to enhance application performance.
- Web Design and Responsive Layouts: Skilled in creating modern, **responsive web designs** that adapt seamlessly to various devices, ensuring excellent user experience.
- Version Control: Experienced in using **Git** and **GitHub** for efficient collaboration and code management.

April' 2023 - Feb' 2024

Swizzdigi Pvt Ltd | Ahmedabad

PHP Web Developer

• JKN Tours & Travels

- Website Link: jkntravels.com/JKN/
- Backend Development: Using PHP as the server-side programming language, I proceeded to develop the backend of the website. This involved implementing functionalities such as user authentication, database management, booking processing, and content management system (CMS) for easy updating of travel packages and information.
- Frontend Development: Alongside backend development, I worked on the frontend of the website using HTML, CSS, and JavaScript. This included creating responsive web pages, implementing interactive features, and ensuring cross-browser compatibility.

PHP Laravel Developer

• Delhi House (Restaurant & Cafe) - Switzerland

- Project Scope: Integration of User Side and Admin Panel
- Backend Framework: Laravel
- User Side Development:
 - Focused on immersive dining experience
 - Dynamic features: menu browsing, reservation management, interactive contact forms.

Expertise

- Core PHP
- PHP Laravel
- Vue JS
- HTML 5
- DB Management
- Bootstrap
- CSS
- Live Server Management (CPanel)
- API Integration
- MVC Architecture
- Version Control (Git)
- AI Integration
- Working with AI
- AI Chatbot

Projects

- Admin Panel Integration:
 - Intuitive admin panel for restaurant staff
 - Centralized control over menu management, reservation tracking, user management, and content updates
- Backend Functionality:
 - Robust solutions for user authentication, data management, and system logic
 - Seamless communication between user side and admin panel
- Database Optimization:
 - Designed and optimized SQL databases using PHPMyAdmin
 - Fine-tuned schemas and indexing for efficient data storage and retrieval

2022 - 2023

Manipal University | Jaipur

PHP Website - Passionate People

- Industry Focus: Developed a website tailored for media industries, emphasizing PR and branding influence.
- Strategic Design: Crafted layouts strategically to captivate visitors and convey brand messaging effectively.
- Technical Foundations: Employed core PHP for robust backend functionality, ensuring seamless data processing.
- Frontend Expertise: Utilized HTML5, CSS, JavaScript, and Bootstrap to create dynamic and responsive frontend interfaces.
- Database Management: Designed and optimized MySQL databases for efficient data storage and retrieval.
- Visual Representation: Created Data Flow Diagrams and Entity Relationship Diagrams to illustrate system architecture and data flow intricacies.

2020 - 2021

JG College of Computer Application (GU)

PHP Website - Akshar Star Electronics

- Logic and Programming: Implemented intricate logic and programming techniques to enhance website functionality and user experience.
- Layout Design: Meticulously designed the website layout to optimize user engagement and navigation, aligning with branding goals.
- Diagram Creation: Developed comprehensive Data Flow Diagrams and Entity Relationship Diagrams to visualize data flow and database structure, aiding in system understanding and development.
- Backend Development: Leveraged Core PHP to build a robust backend infrastructure, facilitating seamless data processing and user interaction.
- Frontend Development: Utilized HTML5, CSS, JavaScript, and Bootstrap to create visually appealing and responsive frontend interfaces, ensuring compatibility across devices.
- Database Management: Established MySQL databases for efficient data storage and retrieval, enabling scalable and organized data management for the website.

Other Experience

○ Crusto - The Natural Store | Ahmedabad
